energy drives the economy economics informs policy and policy affects social outcomes since the oil crises of the 1970s pundits have debated the validity of this sequence but most economists and politicians still ignore it thus they delude the public about the underlying influence of energy costs and constraints on economic policies that address such pressing contemporary issues as income inequality growth debt and climate change to understand why carey king explores the scientific and rhetorical basis of the competing narratives both within and between energy technology and economics energy and economic discourse seems to mirror newton s 3rd law of motion for every narrative there is an equal and opposite counter narrative the competing energy narratives pit drill baby drill against renewable technologies such as wind and solar both claim to provide secure reliable clean and affordable energy to support economic growth with the most benefit to society but how to answer this question we need to understand the competing economic narratives techno optimism and techno realism techno optimism claims that innovation overcomes any physical resource constraints and enables the social outcomes and economic growth we desire techno realism in contrast states that no matter what energy technologies we use feedbacks from physical growth on a finite planet constrain economic growth and create an uneven distribution of social impacts in the economic superorganism you will discover stories data science and philosophy to guide you through the arguments from competing narratives on energy growth and policy you will be able to distinguish the technically possible from the socially viable and understand how our future depends on this distinction

a brilliant and lucid new book john lanchester new york times magazine about why paper money and digital currencies lie at the heart of many of the world s most difficult problems and their solutions in the curse of cash acclaimed economist and bestselling author kenneth rogoft explores the past present and future of currency showing why contrary to conventional economic wisdom the regulation of paper bills and now digital currencies lies at the heart some of the world s most difficult problems but also their potential solutions when it comes to currency history shows that the private sector often innovates but eventually the government regulates and appropriates using examples ranging from the history of standardized coinage to the development of paper money rogoft explains why the cryptocurrency boom will inevitably end with dominant digital currencies created and controlled by

governments regardless of what bitcoin libertarians want advanced countries still urgently need to stem the global flood of large paper bills the vast majority of which serve no legitimate purpose and only enable tax evasion and other crimes but cryptocurrencies are like 100 bills on steroids the curse of cash is filled with revealing insights about many of the most pressing issues facing monetary policymakers from quantitative easing to alternative inflation targeting regimes it also explains in detail why if low interest rates persist the best way to reinvigorate monetary policy is to implement fully effective and unconstrained negative interest rates provocative engaging and backed by compelling original arguments and evidence the curse of cash has sparked widespread debate and its ideas have moved to the center of financial and policy discussions

inflation matters is the first truly comprehensive book about inflation written in a simple and easy to read style the book covers everything from the basics of how inflation is defined and measured through to the impact of inflation and its winners and losers it highlights the difficulty in calculating inflation and that conventional measures such as cpi in the uk often underestimate it for a number of reasons it also examines deflation and why it is regarded as a problem by economists the book examines the history of world inflation it looks at the causes of inflation and shows that they are many and complex the book reveals a new model of inflation inflationary wave theory it proposes that long term inflation is created by population growth and competition for resources price increases depict a wave like pattern over the centuries due to effects of man exploiting the inflation trend to such a point that prices eventually consolidate over a long period the world is about to enter this stage of near zero inflation the book examines how this transition might take place and the conditions that need to be fulfilled it is likely to be accompanied by some form of deflationary shock investing over the coming decades will therefore be difficult and the book discusses the implications of it for future wealth management book contents part i inflation fact and fiction 1 what is inflation 2 inflation and the money supply theory 3 other theories about inflation 4 deflation and why it is regarded as a problem 5 uk inflation measures 6 inflation measurement issues part ii inflation past 7 inflationary wave theory 8 world war i and learning about hyperinflation 9 the 1930s depression and the deflation bogeyman 10 world war ii debts and the low inflation world 11 the 1970s inflation crisis and fiat currencies part iii inflation present 12 the great moderation and the great recession 13 japan and deflation 14 governments and inflation 15 the era of inflation targeting 16 the impact of current inflation part iv deflation yet to come 17 the big picture a century of more stable prices 18 the transition period and near term inflation 19 price stability and the consolidation period 20 managing wealth as we head towards near zero inflation more information can be found at inflationmatters.com

this work documents the many roles filled by southern blacks in the last decades of slavery the civil war years and the following period of reconstruction african americans suffered and resisted bondage in virtually every aspect of their lives but persevered through centuries of brutality to their present place at the center of american life utilizing statements made by former slaves and other sources close to them the author takes a close look at the culture and lifestyle of this proud people in the final decades of slavery their experiences of being in the military and fighting in the civil war and the active role taken by the southern blacks during reconstruction

in addition to conflicts and related security disruptions in the arab region a significant fall in oil prices and their uncertain prospects have become a predominant economic concern with prices plunging by more than 50 per cent in the second half of 2014 nevertheless member countries of the gulf cooperation council gcc have continued to lead growth in the arab region this edition of the survey of economic and social developments in the arab region looks at the continued expansion of the non oil sector as it maintains gcc economic growth lower oil prices have not yet negatively affected the gcc economically although confidence has dropped with weakening stock markets and real estate transactions furthermore lower oil prices have benefited oil importing arab countries by easing their balance of payment and fiscal constraints with conflict and violence in the region one of the main channels for

economic stabilization has been intraregional flows of capital and remittances from the gcc countries

economists have long viewed recessions as contributing to increasing inequality however this conclusion is largely based on data from a period in which inequality was increasing over time this paper examines the connection between long run trends and cyclical variation in earnings inequality we develop a model in which cyclical and trend inequality are related and find that in our model recessions tend to amplify long run trends i e they involve more rapidly increasing inequality more when long run inequality is increasing and more rapidly decreasing inequality when long run inequality is decreasing in support of this prediction we present evidence that during the first half of the 20th century when earnings inequality was generally declining earnings disparities indeed appeared to fall more rapidly in downturns at least among workers at the top of the earnings distribution

develops the empirical and theoretical case that differences in economic institutions are the fundamental cause of differences in economic development abstract
